

POD Mission Trip Info

The focus or purpose of this mission trip is to visit schools and girls centers, providing washable, reusable sanitary pads as well as speaking on topics that we have been asked by the schools to speak on from the basis of God's love for them. We may also do some construction related work assisting with the finishing of the Owade church.

We will be driving 2 to 3 hours each way most every day, and then speaking for approximately two hours before returning to our retreat center. Each person on the team will participate in this speaking, which will include sharing your testimony in a relatable way with these girls.

The topics are requested by the schools and have previously included menstruation, sexuality, lesbianism, family conflicts, relationship, problems, and study habits.

You will need:

- A current passport that has at least six months from the return date on it.
- A Kenya eTA which costs \$34. We will review how to get this online.
- Immunizations or boosters advised for travel to Kenya. Some insurances cover these while others do not. Costco pharmacy has a Travel pharmacist that can provide information and the immunizations at the best prices I have found.

*****It is very strongly advised to purchase travel insurance.*****

- The estimated cost for this trip is approximately \$3000.
- The time frame for the trip is a 12 day to two week period
